[Who, What, Where - The Many Ways to Search in PP](#)

[Quick Access](#)

[Build Custom Reports](#)

[Introduction](#)

Just as important as finding the information you're looking for is *excluding* the information you *don't* need to see. Learning to quickly find the exact transactions, tasks, or docs you need to manage in Pipeline is one of the best ways to get in and out of the system quickly with minimal distraction.

Popular searches supported in Pipeline include:

- [Power Search by Agent Name](#) to **find all transactions for a specific agent** (e.g., Find transactions where agent last name is "Lane" while excluding transactions with Transaction Name that contains "Lane")
- [Power Search by Transaction Name](#) to **search for specific text within a Transaction Name only** (e.g., Find Transaction names that contains "Jackson" while excluding transactions with agents whose name is "Jackson")
- [Power Search by Buyer or Seller Name](#) to **search transactions by Buyer or Seller name**
- [Filter Tasks by Due Date](#) (e.g., to **view only tasks due today**)
- [Power Search within a specific field](#) and [use the Transactions Page Search Options](#) to **combine search criteria in filter sections** (e.g., Find all transactions for agent **smithson** that are closing **this week**, are **Residential properties**, and **don't have commissions entered**)
- [Filter Unreviewed Docs by Doc Label](#) to **search for docs with a particular doc label** (e.g., Find docs with a **Doc Label of "Needs Review"** while reviewing docs)
- [Filter Tasks by Agent Checked](#) to **find all tasks agents have indicated they have completed**
- [Filter Tasks by Your @ Tasks](#) to **find all tasks highlighted or assigned to me** (where I am @mentioned)

Who Can Do This?

All Pipeline users can search for transactions, tasks, and docs they have access to. Only admin users have the ability to download transaction spreadsheets.

How To

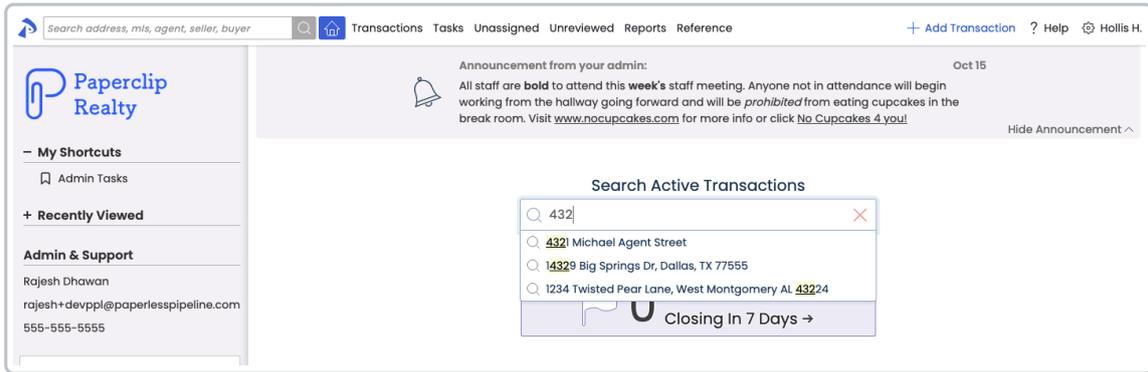

Search Transactions

Each of Pipeline's transaction search options can be useful in different ways. Whenever you search or sort transactions, you'll have the option to view the resulting list, download it as a spreadsheet, and/or save the search criteria as a shortcut for quick access to it later.

[Search Active Transactions from Home Page](#)

On the *Home* page, type any part of a transaction's name into the *Search Active Transactions* field to

instantly find matching active transactions. [Learn how to Search Active Transactions](#) →

Power Search Transactions

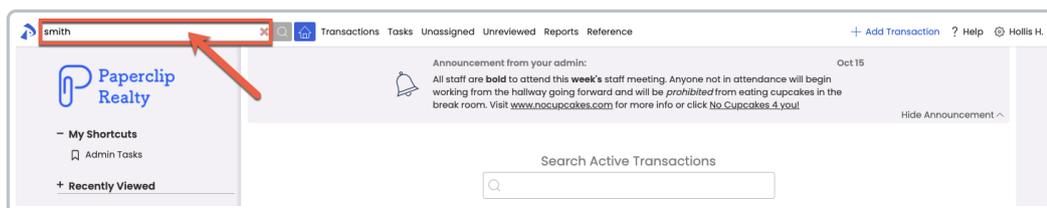

From anywhere in Pipeline, use the transaction Power Search to either search within multiple fields at once (*Address, MLS, Agent, Seller, and Buyer*) or to search within a specific transaction field.

Search Multiple Fields at Once (*Address, MLS, Agent, Seller, and Buyer*)

When you enter your search term in Power Search, the system will search each transaction's *Address, MLS, Agent, Seller, and Buyer* field then return a list of transactions where your search term exists in any of those fields.

To search across multiple fields at once:

- 1 Enter all or part of your search term into the Power Search field in the upper-left corner of any page in Pipeline.

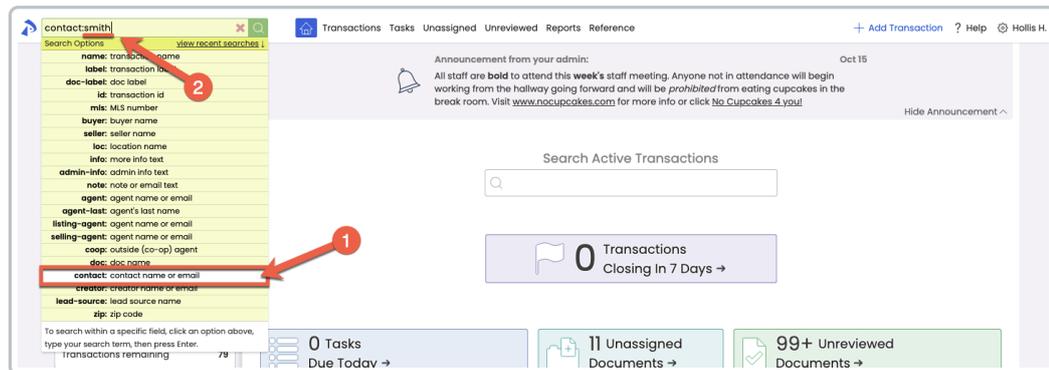

- 2 Click [Search] or press "Enter/Return" on your keyboard. A list of transactions where your search term exists in the *Address, MLS, Agent, Seller, and Buyer* fields will be displayed in the resulting list.
- 3 Once your resulting list of transactions appears, if desired, [use the search options on the Transactions page](#) to further filter your results.

Search Within a Specific Field

Use the field-specific search options to search for transactions that contain information within a specific field.

To search within a specific transaction field:

- 1 From the upper-left corner of any page in Pipeline, click inside the **Power Search** box to display the search options.
- 2 Select the transaction field you want to search within, then enter your search criteria. For example, to search within the *Contact* field, select [Contact] then enter part of a contact's last name or email address.

- 3 Click the **Search** icon or press **"Enter/Return"** on your keyboard. A list of transactions where your search term exists within the field you specified will be displayed in the resulting list.
- 4 Once your resulting list of transactions appears, if desired, use the search options on the *Transactions* page to further filter your results.

On-Page Searching

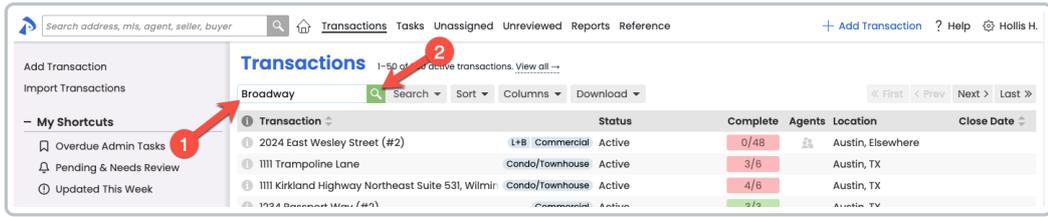

On the *Transactions* page, quickly search for transactions by multiple fields at once (*Address, MLS, Agent, Seller, and Buyer*) or use the powerful advanced search options to refine your list of transactions by certain transaction fields and stats.

Search

Use the search field on the *Transactions* page to search for transactions by *Address, MLS, Agent, Seller, and Buyer*.

To run a quick search for transactions by multiple fields at once:

- 1 Click [Transactions] from the top menu.
- 2 In the search box at the top of the page, enter all or part of your search term.
- 3 Click the green [Search] icon. The system will search each transaction's *Address, MLS, Agent, Seller, and Buyer* fields then return a list of transactions where your search term exists in any of those fields.

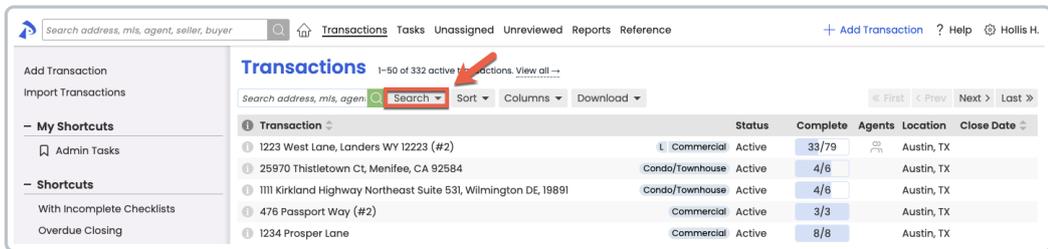

More Search Options

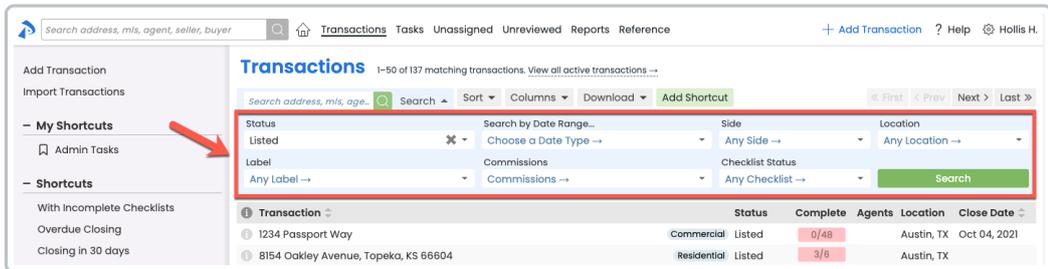

The *Transactions* page offers additional search options to help you refine your transactions search. Use the search options to adjust (and optionally, save) your default list of transactions or to fine-tune the results of other searches.

To refine your transactions search:

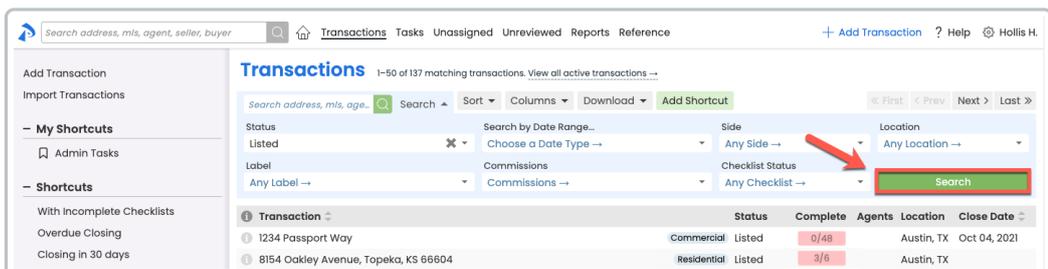

- 1 From the top of the *Transactions* page, click [Search] to expand the search area.

- 2 Select or enter all desired search criteria for any field in the shaded search area.

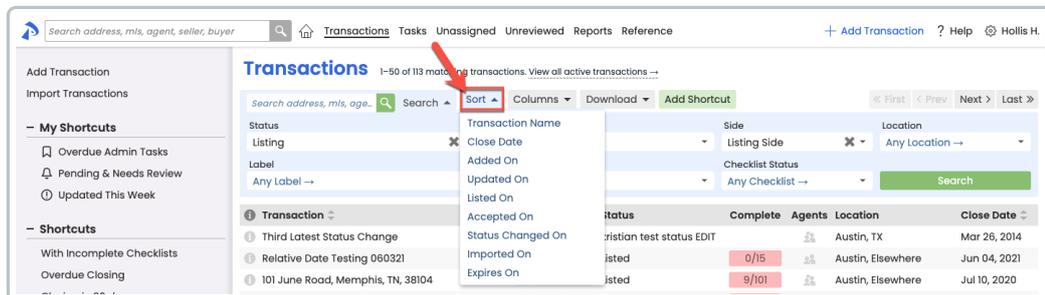

- 3 Click the green [Search] button. The matching transactions will be displayed in the resulting list.

Sort

Use the sort option to sort (and optionally, save) your default list of transactions or to fine-tune the results of other searches.

- 1 From the top of the *Transactions* page, click the [Sort] tab.

- 2 Select your desired sort field. The resulting list of transactions will be sorted by the field you selected. If the sort field you selected wasn't already visible on the *Transactions* page, it will be added in place of the *Close Date* once you execute the sort.

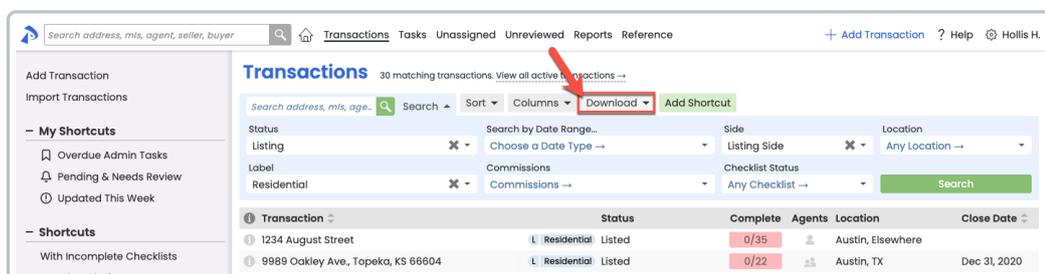

Use the sort option to display a transaction field that isn't available on the *Transactions* page by default. When you sort by a field that isn't already visible on the *Transactions* page, your selected sort field will replace the *Close Date*.

Download a Spreadsheet Report

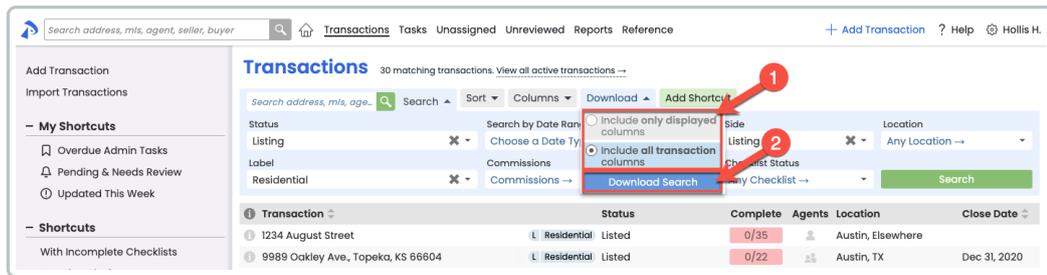

After you search or sort transactions, you can optionally download the resulting list as a spreadsheet.

To download a spreadsheet of your transaction search results:

- 1 Once you've searched and/or sorted, click [Download].

- 2 Select [Include only displayed columns] to generate a spreadsheet of results that only includes the columns displayed on the *Transactions* page.
Or select [Include all transaction columns] to generate a spreadsheet of results that includes all transaction fields.

3 Click [Download Search].

 Hidden columns will not be included in the download when selecting "Include only displayed columns". [Learn more about showing/hiding columns](#) →

 This section describes downloading transaction lists. [Learn more about downloading individual transactions here](#) →

Save a Custom Search/Shortcut

Once you've run your desired search and/or sort on the *Transactions* page, you can optionally save the search criteria to your *My Shortcuts* menu for quick access to it later. This is most useful for searches/sorts you may run regularly.

[Learn how to Save Transaction Shortcuts](#) →

Search Tasks

The *Tasks* page allows you to search and filter tasks to focus on the exact tasks you need to see.

[Learn how to search, filter, and sort tasks on the Tasks Page](#) →

Search Unassigned & Unreviewed Docs

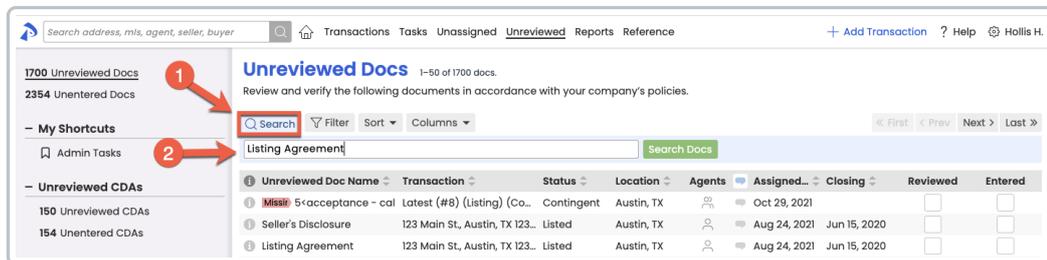

Search and filter unassigned and unreviewed docs to focus on the docs that need your action.

On-Page Searching

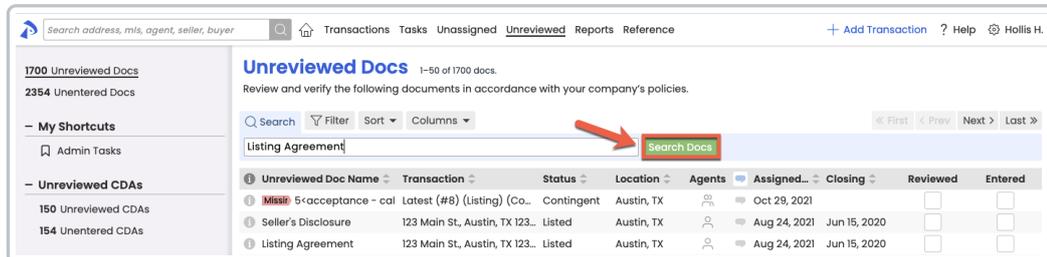

Search

To search for unassigned or unreviewed docs:

- 1 Click [Unassigned] or [Unreviewed] from the top menu.
- 2 Click [Search], then enter all or part of your search term into the search field. The system will search for your term within the doc name, the transaction name, and the uploader name.

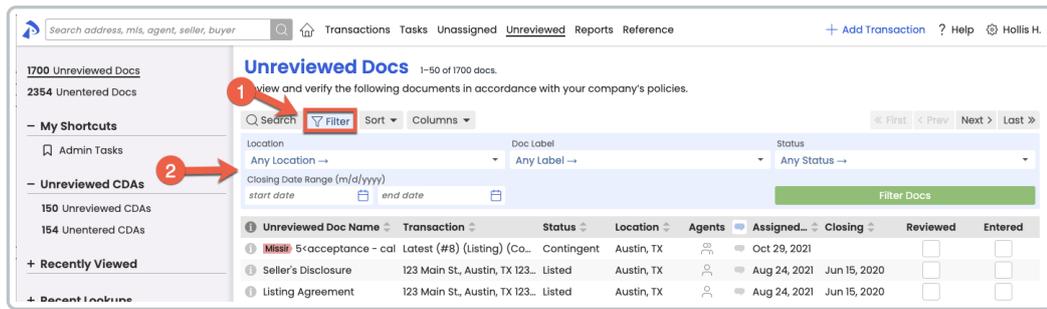

- 3 Click [Search Docs]. The docs that match your search term will be displayed in the resulting list.

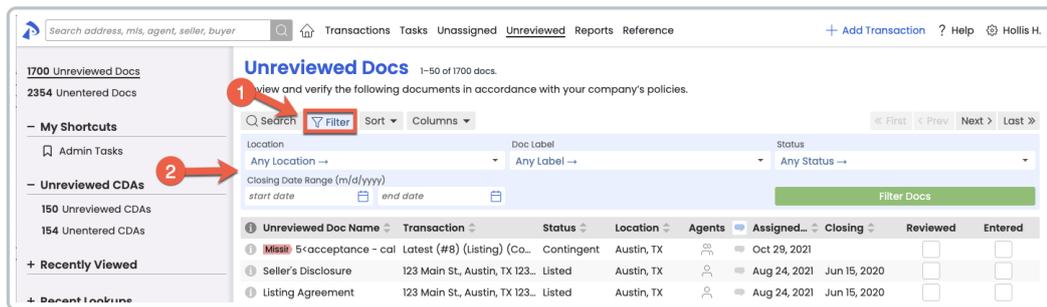

Filter

To filter your list of unassigned or unreviewed docs:

- 1 Click [Unassigned] or [Unreviewed] from the top menu.
- 2 Click [Filter], then select your desired filter options. Combine any of the available filters for a refined, targeted search.

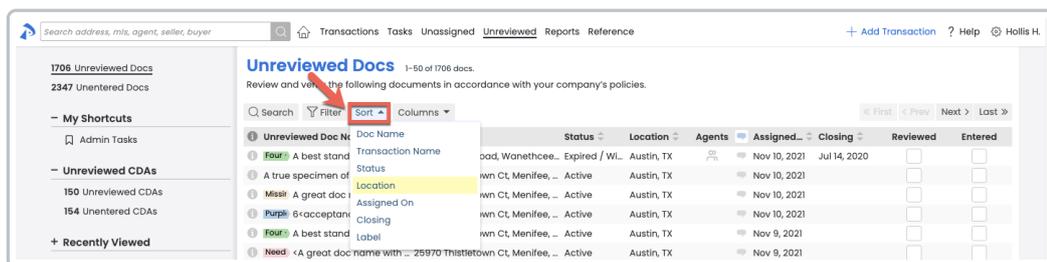

- 3 Click [Filter Results]. The docs that match your filter criteria will be displayed in the resulting list.

Sort

To sort your list of unassigned or unreviewed docs:

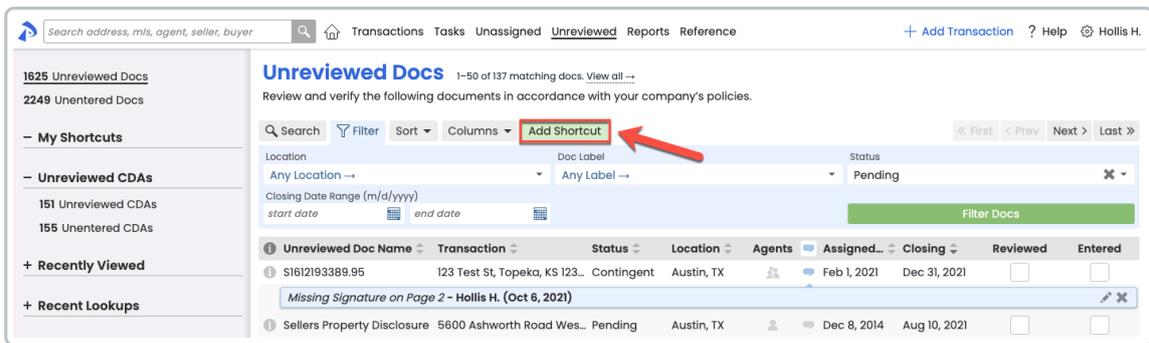

- 1 Click [Unassigned] or [Unreviewed] from the top menu.
- 2 Click [Sort], then select your desired sort field. The resulting list of docs will be sorted by the field you selected.

Save a Custom Search/Sort as a Shortcut

Once you've run your desired search, filter, and/or sort on the *Unreviewed* or *Unassigned* page, you can optionally save the search criteria to your *My Shortcuts* menu for quick access to it later. This is most useful for searches/sorts you may run regularly.

[Learn how to Save Custom Shortcuts →](#)

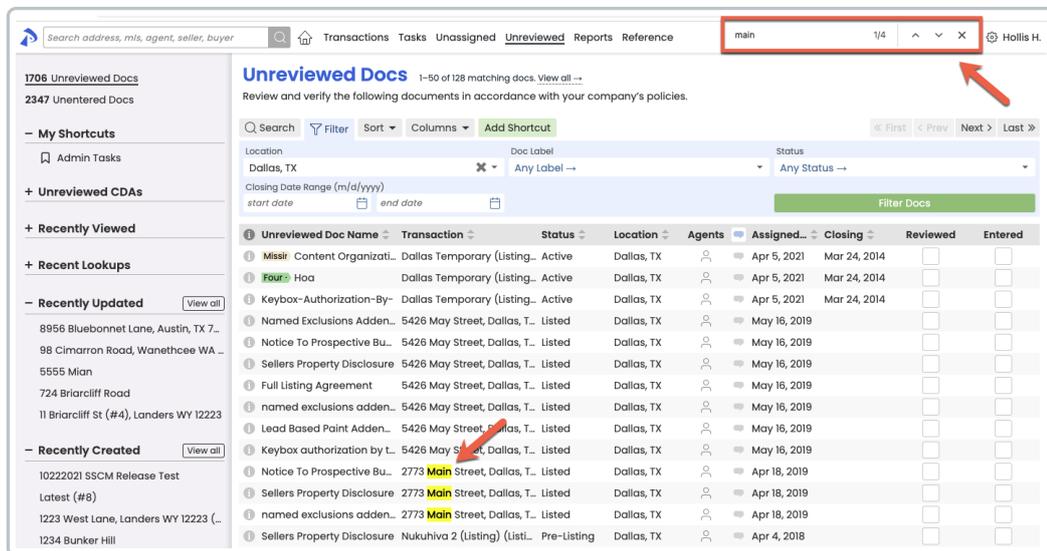

General On-Page Searching

On any page in Pipeline, user your web browser's inherent search capability to quickly find text.

To find specific text on any Pipeline page:

- 1 On a PC, hold down the CTRL key + the F key (Ctrl+F).
On a Mac, hold down the COMMAND key + the F key (Cmd+F).
Your browser's search menu will appear.
- 2 Enter all or part of your search term, then press "Enter/Return" on your keyboard. Your search term will be highlighted wherever it appears on the page.
- 3 To navigate through each resulting instance of your search term, use the "Enter/Return" key on your keyboard or the arrows within your browser's search menu.
