

Customize Transaction Statuses

SUMMARY

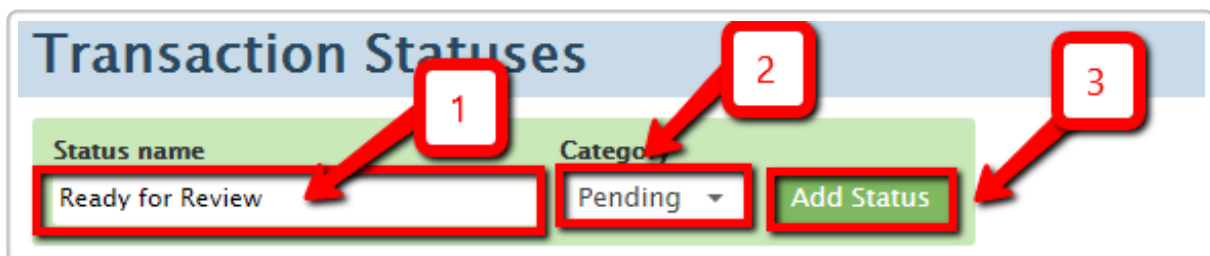

This article describes how you can create custom transaction statuses to match your company's transaction management workflow.

IN THIS ARTICLE

1. [Add a New Status](#)
2. [Edit a Status](#)
3. [Deactivate a Status](#)
4. [FAQ](#)

Add a New Status

- 1 Click your name in the upper right corner then "Admin / Settings".
- 2 Click [Transaction Statuses] from the left menu.
- 3 Click [Add Status].
- 4 Type the status name, choose a category, and click [Add Status].

The screenshot shows the 'Transaction Statuses' form. It has a title bar 'Transaction Statuses' and a form area with a light green background. The form contains three main elements: a text input field for 'Status name' containing 'Ready for Review', a dropdown menu for 'Category' set to 'Pending', and a green 'Add Status' button. Three red callout boxes with numbers 1, 2, and 3 are overlaid on the form. Callout 1 points to the 'Status name' input field. Callout 2 points to the 'Category' dropdown menu. Callout 3 points to the 'Add Status' button.

Edit a Status

To edit an existing status:

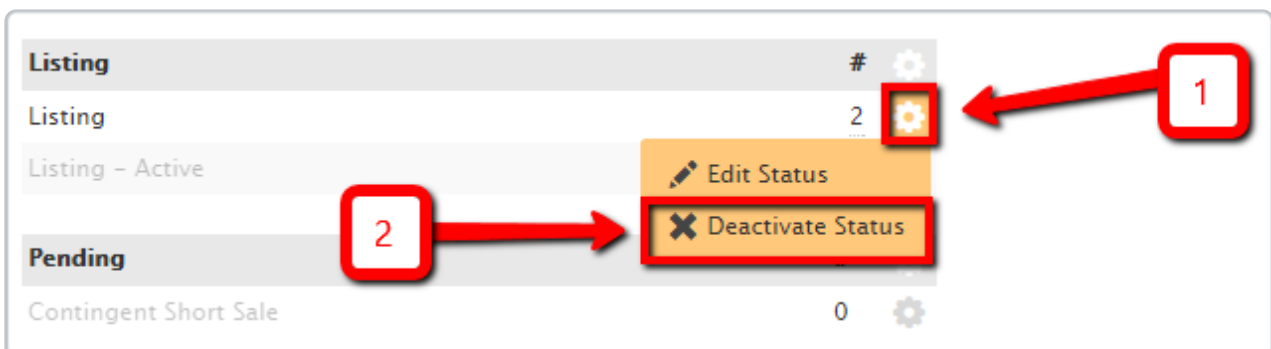

- 1 Click the [gear] next to an existing transaction status.
- 2 Select [Edit Status].
- 3 Make the desired changes.
- 4 Click [Save].

Deactivate a Status

When you deactivate a status, all existing transactions will retain the status but it can no longer be applied to any new transactions. If there are no transactions using a deactivated status, it will be removed. To deactivate an existing status:

- 1 Click the [Gear].
- 2 Select [Deactivate Status].
- 3 Click [Deactivate] to confirm.

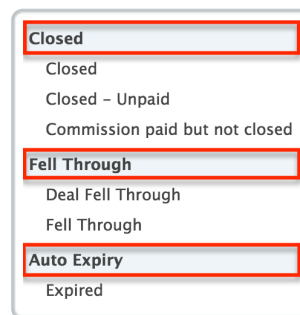

View all transactions that use a status by clicking the transaction count to the right of the status.

FAQ

Q: Which statuses get backed up in the Monthly Backup?

A: Inactive transactions should be assigned a status that is under either the Closed, Fell Through or Auto Expiry transaction status categories. Transactions with statuses in those inactive categories will get backed up during the subsequent monthly backup (and they will also no longer show up by default on transaction lists).

Q: Who can create new custom statuses?

A: Only master admin can create, change or add new statuses.

Q: What is the difference between the active vs. listing status category?

A: Since statuses are completely customizable, you can use the Active status category in whatever way makes sense and is meaningful for your office.

Many offices use the active status like an Inbox. On seller-sided transactions, Active is often used for pre-listing properties (e.g., properties not in MLS yet). For buyer-sided transactions, the active status can be used for transactions that are not yet under contract.

The listing status category is used for active listing statuses. The system uses statuses under the listing category in two ways:

- To enable the auto-expiration of listings feature. Users will only be

able to add an automatic expiration date to a transaction when it is assigned a status that falls under the listing status category.

- *To track listings in the Commission Summary report. The report will only include transactions that are assigned to statuses that fall under the Listing status category.*
