

Fillable PDF Docs Not Saving in Chrome Browser

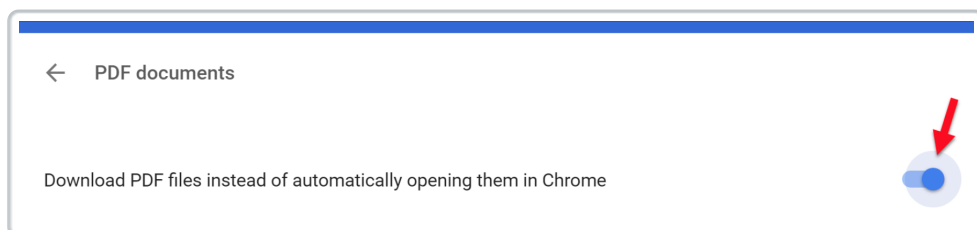

SUMMARY

Updates to fillable PDF docs are not saved by Chrome. This problem occurs because Chrome's built-in PDF viewer does not support saving of updates made to fillable PDF docs.

Workaround

To get around this, replace Chrome's built-in PDF viewer with Adobe Reader. Here's how:

- 1 Type this into into the address of your Chrome browser:
`chrome://settings/content/pdfDocuments`
- 2 Turn on the option to: "Download PDF files instead of automatically opening them in Chrome".

- 3 Open downloaded PDFs in [Adobe Reader](#) → on your computer.

If Adobe Reader is not an option when opening PDFs, make sure it's installed and updated on the computer. [Download Adobe Reader here](#) →
