

Yellow Tip Bubbles (Pop Ups) Won't Go Away

SUMMARY

Learn how to make yellow tip bubbles go away in Paperless Pipeline.

PROBLEM

Yellow tool tip bubbles (like the one below) keep being displayed even after you have clicked the "OK, got it" button.

SOLUTION

Make sure that you are clicking directly on the "OK, Got it" button on each yellow popup tool tip. That tells Pipeline that you have seen that particular tip. It will then not show that tip again.

If the same tool tip keeps getting shown even after you have clicked "OK, Got it", try this:

On a Mac

- 1 Clear your browser cache by holding down the Command and Shift keys on your keyboard then tapping the 5 key (command-shift-5).

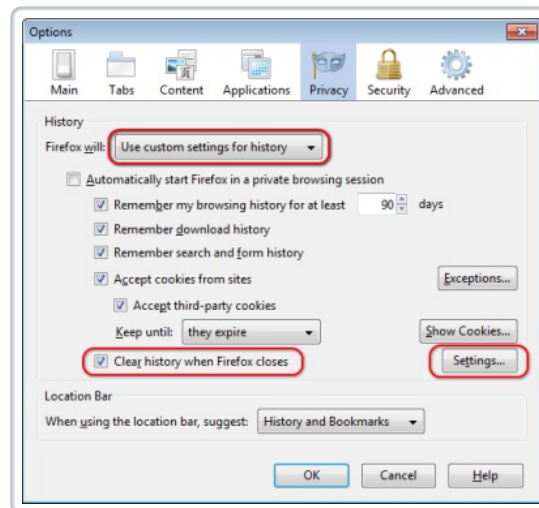

On a PC

- 1 Clear your browser cache by holding down the Ctrl key on your keyboard then tapping the F5 key (Ctrl+F5).

If Using Firefox

If you use Firefox as your web browser, make sure the "Clear History When Firefox Closes" option is not checked. Here's how:

- 1 Click the settings bars in the upper right corner of Firefox Click Privacy.
- 2 In the History section, make sure "Use Custom Settings for History" is selected. If you don't have that Firefox will "Use Custom Settings for History" like shown below, then disregard this step.
- 3 Make sure the "Clear History When Firefox Closes" checkbox is not checked.

If you've completed these steps and the yellow bubbles still won't go away, please email help@paperlesspipeline.com for further assistance.
